

A Health and Awareness Conference
In memory of Jenny Fry 03/10/1999 – 11/06/2015

The

INCONVENIENT REALITY

Discussing the impact on our health and ecology from current wireless technologies including Mobiles, WiFi & Smart Meters

Why the development of **safer** systems and devices is **essential** for a **healthier**, **greener**, sustainable future.

May 13th 2023 10.00 am - 5.30 pm

Odcombe Village Hall BA22 8XP

Tickets; £25.00 including Refreshments

Guest speakers include:-

Debby Fry

Mother of Jenny Fry
Campaigner to get Wi-Fi switched off in schools and public buildings

Michael Bevington

Retired 'Classics' teacher
Chair of Electro-Sensitivity UK (ES-UK) and IGNIR

Barrie Trower

Independent research physicist sought globally for his subject matter expertise and advice

Brian Stein CBE

Chair of Radiation Research Trust
Trustee of ES-UK, retired CEO of one of UK's top food manufacturers

Dr Andrew Tresidder

Somerset Doctor
Trustee of ES-UK

Neil Boxall

M.Eng, C.Eng
Founder of EMF Aware Somerset

Professor Martin Pall USA

Screened extracts of his talk in Sussex 3/11/2018, effects of radio frequency radiations on our cells voltage-gated calcium channels

Information and Tickets call Peter on 01935 423002

Please respect ES* attendees & speakers- **No** mobile phones, iPad's, smart devices etc in the hall. Please car share if possible

*** see overleaf**

Charity **ES-UK** states:-

*Electro-sensitivity (ES) is a physical intolerance of electromagnetic fields, described since 1932. At first, electrical, radio and radar workers were affected, but it has now spread into the general population as mobile phones, phone masts, Wi-Fi and smart meters have become common.

What some of the **Independent** experts say:-

‘Radio Frequency Radiation is carcinogenic’

Professor Anthony Miller, M.D, FRCP (Canada)
former advisor to the World Health Organisation

‘Over exposed and deceived, what the cell phone industry
doesn’t want you to know’

Dr Marc Arazi, (France)

‘Not a single, peer reviewed scientific study has been carried out
on the health risks associated with 5G’

Professor Tom Butler, University College, Cork

There has been ‘no health research for 5G’

‘We are taking risks of the sort that no rational society on earth
should take’

Professor Martin Pall (USA)
